Astrum Shah Alam – Homepage Enhancement Report

1. Hero Section Refinement

- Converted layout to 40% text / 60% image split.
- Reduced banner height for a cleaner premium look.
- Maintained transparent-to-solid header behavior on scroll.
- No JavaScript functionality affected.

2. Header Optimization

- Reduced navigation bar height for better proportions.
- Adjusted logo scaling to prevent distortion.
- Refined CTA button padding for visual balance.

3. Project Details Section

- Added new 60/40 layout with embedded Google Drive video.
- Applied premium framed video styling.
- Ensured white typography consistency on gold background.
- Fully responsive for mobile devices.

4. LRT Section Replacement

- Removed old timeline layout.
- Replaced with full-width image placeholder (.webp).
- Structured for easy image replacement in future.

5. Location Section Redesign

- Replaced map grid with modern 3-image layout.
- Optimized image heights for alignment balance.
- Improved spacing and mobile responsiveness.

6. Gallery Placeholder Section

- Added new 4-image grid layout.
- Rounded corners with subtle shadow effect.
- Structured with replaceable .webp placeholders.

7. Layout & Spacing Improvements

- Reduced excessive vertical spacing.
- Improved grid alignment and visual hierarchy.
- Maintained consistent design rhythm across sections.

Technical Integrity

- All updates performed via HTML/CSS only.
- No existing scripts modified.
- Website performance and functionality preserved.
